# S&P500 ES 4hour intraday chart

April 3<sup>rd</sup> 2018

**Nomura: If S&P Hits 2535, CTAs Go "Max Short", Sell \$100 Billion**

This 2535 level 'clusters' along with the 1Y ES1 VWAP (2539) and the YTD lows (2532.5) in the same range, **effectively creating a "stop loss" for many where 'longs' turn into losses**
