

Chart Book Market Update

May 9, 2019

"I think that we're in a late cycle and I think the market can only be termed by the way I look at evolution of market prices as a bear market," Gundlach said. **"The market hasn't gone anywhere in 15 months and its down in many parts of the world."**

So, I don't know - I'm going to flip the question.

If anybody wants to say how can I say it's a bear market, how can I say it's a bull market? I mean it's been a good year to date, yes I agree. **But to characterize the last 15 months as a bull market is just wrong."**

Jeffrey Gundlach
