Bull vs. Bear Smackdown: Where Are Stocks and Bonds Heading?

Join John Netto as he moderates a bull vs. bear debate between Big Picture Trading's Patrick Ceresna and Macro Tourist Kevin Muir. The panel discussion will focus on where the stock market is heading while also taking a deep dive into the bond market - highlighting the direction of interest rates and the trade opportunities associated with both asset classes.

- Where are the global stock markets heading next?
- Are interest rates heading higher or lower and where on the curve to trade?
- Shorter-term trends vs. the big picture trades developing.

**Patrick Ceresna**
