The Fed's Message: The Money-Printing Presses Are Fired Up and Ready to Go

Its actions Monday show it will do anything necessary to address a glaring shortage of dollars across the economy.

FULL TRANSCRIPT: FED CHAIR JEROME POWELL'S 60 MINUTES INTERVIEW ON ECONOMIC RECOVERY FROM THE CORONAVIRUS PANDEMIC

Jerome Powell lays out his thoughts on getting the economy back to its pre-coronavirus numbers. The transcript from the Federal Reserve chairman's interview with Scott Pelley.

“

PELLEY: But I'm curious about that moment for you personally. When you were sitting in your office, through that door over there, and you were watching your Bloomberg Terminal and the world was coming apart, what did you say to Jay Powell?

POWELL: Well, what'd I say to me? You know it didn't happen. It wasn't a light switch being flipped. **So we saw it coming. And we had been thinking about what we would do.** [emphasis added]

LIE #1

“

PELLEY: Fair to say you simply flooded the system with money?

POWELL: Yes. We did. That's another way to think about it. We did.

PELLEY: Where does it come from? Do you just print it?

POWELL: We print it digitally. So as a central bank, we have the ability to create money digitally. And we do that by buying Treasury Bills or bonds for other government guaranteed securities. And that actually increases the money supply. **We also print actual currency and we distribute that through the Federal Reserve banks.** [emphasis added]

LIE #2

“

PELLEY: Has the Fed done all it can do?

POWELL: Well, there's a lot more we can do. We've done what we can as we go. But I will say that we're not out of ammunition by a long shot. No, there's really no limit to what we can do with these lending programs that we have. So there's a lot more we can do to support the economy, and we're committed to doing everything we can as long as we need to.

Not Money Printing

“ Companies have already drawn down more than \$50 billion of their revolvers to prepare themselves for the crisis (**this already dramatically exceeds what happened in the global financial crisis**). Many others have requested additional credit, which we have been offering judiciously – more than \$25 billion of new credit extensions were approved in the month of March alone. [emphasis added]

Not Money Printing

“ POWELL. But I would just say this. In the long run, and even in the medium run, you wouldn't want to bet against the American economy. This economy will recover. And that means people will go back to work. Unemployment will get back down. We'll get through this. It may take a while. **It may take a period of time. It could stretch through the end of next year.** We really don't know. We hope that it will be shorter than that, but no one really knows. [emphasis added]

Federal Reserve Chairman Jay Powell
