In This Week's Episode on Smarter Markets...

Maryam Ayati

Energy industry veteran and NEO co-founder and CEO Maryam Ayati reacts to Robert Friedland's vision of grading and trading commodities based on ESG aspects of how they're produced, and expands on Robert's ideas to explain how the entire commodity supply chain could be tokenized using distributed ledger technology, and how commodities could literally be traced to their source using new "watermark" technology that applies molecular-level digital fingerprints to almost any commodity.

Coming This Weekend on Smarter Markets*

Jeff Currie

Goldman Sachs commodities chief Jeff Currie weighs in on the next commodity cycle, the return of inflation, and why it's essential for the marketplace to figure out how to put a price on carbon in order to enable the realization of ESG objectives. Jeff goes on to describe tokenization of commodity futures warehouse receipts as the best use case he's heard for distributed ledger (a/k/a/ "Blockchain Technology").

Beyond Blockchain

The Death of the Dollar and the Rise of Digital Currency

[Check out Erik Townsend's new book!](#)

The cryptocurrency trend of the past few years has continued to grow despite widespread predictions that it would just be a flash in the pan. Blockchain is suddenly everyone's favorite buzzword. But what if there's more to this story than meets the eye? What if Digital Currency is about to change the world in ways beyond our imagination? And what if geopolitical forces our politicians don't even understand have already inspired China and Russia to use Digital Currency to attack the U.S. Dollar's dominance over the global financial system?

Erik covers these subjects and more in his recently published book. Please visit www.macrovoices.com/bb for more information and to order the paperback, Kindle, or audiobook.
