Discover Erik's New Energy Crisis Docuseries

Erik's new project for 2023 is to produce a Documentary Series about the coming global energy crisis, what caused it, why it's too late to avoid it, and how to solve it. This docuseries examines why wind and solar will never replace even half of the energy now derived from fossil fuels, why a global energy price crisis is a near certainty by 2025, and what the realistic options are to bring on more clean energy supply to replace fossil fuels by 2050.

Erik is previewing the audio-only narration track with the MacroVoices community to solicit feedback and critique. Use the links below to access the audio previews of what will eventually be a video documentary series.

Beyond Blockchain

The Death of the Dollar and the Rise of Digital Currency

[Check out Erik Townsend's new book!](#)

The cryptocurrency trend of the past few years has continued to grow despite widespread predictions that it would just be a flash in the pan. Blockchain is suddenly everyone's favorite buzzword. But what if there's more to this story than meets the eye? What if Digital Currency is about to change the world in ways beyond our imagination? And what if geopolitical forces our politicians don't even understand have already inspired China and Russia to use Digital Currency to attack the U.S. Dollar's dominance over the global financial system?

Erik covers these subjects and more in his recently published book. Please visit www.macrovoices.com/bb for more information and to order the paperback, Kindle, or audiobook.
